## COLOMBIAN ASSOCIATION OF PROFESSIONAL ENGINEERS

# COLOMBIAN ASSOCIATION OF PROFESSIONAL ENGINEERS

## ABOUT US

The COLOMBIAN ASSOCIATION OF PROFESSIONAL ENGINEERS, C.A.P.E is a non profit organization registered at the Bogotá Chamber of Commerce, that promotes engineering services of it's members in Colombia and internationally, following professional standards and ethical models of similar organizations in the United States of America.

## MISSION

To promote and encourage good practices in Colombian engineering industry in order to protect public and the image and prestige of Colombian engineers.

## VISION

To achieve a position of Association in the Colombian and international Engineering industry as an entity that seeks good, responsible and secure practices supported by a proposed Model of Laws like to the United States Models as criteria for effective and successful promotion of Colombian engineering services to other countries and vice-versa.

## OBJECTIVES

To congregate associates engaged with fundamental engineering codes of good practice applied to all their projects whatever can be the nature and expertise required to perform such projects; to promote national and international relationships between Colombian professionals, companies and other groups, between Colombia and United States entities, pursuing regulations of professional practice

## POLICIES OF QUALITY

To optimize the available human resources of the organization represented by its members, to achieve positioning goals in the Colombian society and to promote its institutional relationships.

## REQUIREMENTS

EI/ PE certificate; ethical commitments, responsibility before United States Boards of Engineering. Candidates should demonstrate acceptance for a registration of licensing process to any State Board; proof of, or engineering registration exams, will be acceptable.

## PLANNING AHEAD

For 2006 year CAPE will straighten efforts with Colombian universities, student organizations and others, to promote EI/PE licensure as an actual and professional option towards work positions and business opportunities for undergraduate and graduated engineers.

CAPE will continue improving professional development programs; seminars, conferences, workshops as long as national and international alliances.
